The rapid growth and development of the video surveillance industry also extends to the surrounding cabling and infrastructure networks. While many people associate a video surveillance solution with a camera, an effective video surveillance solution also requires seamless and comprehensive cabling and infrastructure networks to meet an end-user’s needs.

This first edition report explores the effect that a rapidly developing video surveillance market is having upon the associated markets for cabling, Ethernet switches and infrastructure used in video surveillance applications. This report provides a comprehensive and granular assessment of the total market for cabling and infrastructure used in video surveillance with market size, forecast and analyses of key trends, along with analysis of market shares and the competitive environment.

---

**Key Issues Addressed**

- How fast will the market transition to higher category Ethernet cabling?
- Who are the leading providers in each region?
- What role will video surveillance take on in the IT world?
- How does the uptake of POE solutions affect the market?
- How do the forecast growth rates for managed and unmanaged switches compare?

---

**Applicable To**

- Cabling Companies
- Networking Companies
- Systems Integrators
- Investors
- Video Surveillance Equipment Manufacturers

---

**Report Breakdown**

**Frequency, Time Period**

- 5-year annual forecast (2012 - 2018)

**Measurements**

- Revenue ($ millions)
- Unit shipment
  - (000's) Switches and Adaptors
  - (Kilometres) cable
- Average Selling Price ($)

**Regions, Markets**

- EMEA
- Americas
- Asia

**By End User Industry**

- Banking and Finance
- Casinos and Gaming
- City Surveillance and Traffic Monitoring.
- Commercial
- Data Centres
- Education
- Government
- Healthcare
- Manufacturing and Industrial
- Residential
- Retail
- Sports and Leisure
- Transportation
- Utilities and Energy

**Products Covered**

- Cable
  - Coax
  - Ethernet (Cat 5, 5e, 6, 6a and above)
  - Fibre
- Ethernet Switches
  - By Port Number (4,8,16,24+)
  - By Type (Managed/Unmanaged)
- Adaptors
  - IP over Coax
  - Midspan Injectors
  - Ethernet Extenders
Executive Summary

Chapter 1 – Introduction, Scope and Method
- Introduction
- Scope
  - Product Definitions
  - End-User Industry Definitions
- Report Content
- Method
  - Information Sources
  - Forecasting Method
- Exchange Rates

Chapter 2 – Market Description and Trends
- Introduction
- The Market for Video Surveillance Equipment
- The Economic Outlook
- Standards and Initiatives
- The Market for Wireless Infrastructure Used in Video Surveillance
- Power over Ethernet
- Copper Pricing
- Network Video Surveillance Design

Chapter 3 – Market Statistics and Trends
- Introduction
- The World Market for Cabling and Infrastructure Used in Video Surveillance Applications by Product Type
  - The World Market for Ethernet Cabling by Cable Type
  - The World Market for Switches by Type
  - The World Market for Switches by Port Number
  - The World Market for Cabling and Infrastructure Adaptors by Product Type
  - The World Market for Cabling and Infrastructure Used in Video Surveillance by End-user Industry
  - The World Market for Cabling and by Region
  - The EMEA Market for Cabling and Infrastructure Adaptors by Product Type
  - The EMEA Market for Ethernet Cabling by Cable Type
  - The EMEA Market for Switches Used in Video Surveillance Applications by Type
  - The EMEA Market for Switches by Port Number

Chapter 4 – Competitive Environment
- Introduction
  - Competitive Environment
    - Ethernet Switch Vendors
    - Cabling Vendors
  - Market Share Estimates
    - World Market Share Estimates
    - EMEA Market Share Estimates
    - Americas Market Share Estimates
    - Asian Market Share Estimates

Appendix 1 – List of Tables and Figures
